Since its creation in 2001 until the academic year 2017-2018, the Foundation has granted bursaries to **2,882** students of ULK (Kigali and Gisenyi Campuses) to help them complete their university studies.

The available internet connection allows the university community to carry out free of charge, research, documentation as well as exchange with the rest of the world aided by a digital library of more than 600 computers, connected to important world e-resources. All offices have computers which are connected to internet, with free of charge access. In addition to this, wireless connection is available in our Campuses.

PART II: KEY ACHIEVEMENTS FOR THE 2017-2018 ACADEMIC YEAR

This section presents key achievements as covered into the following aspects:

1. Teaching;
2. Library;
3. Research and Consultancy;
4. Cooperation;
5. Service to the community;
6. Administration and finance;
7. Infrastructure and equipment;

2.1. Teaching

- Teaching is the integral part of the university's mission. The following part emphasizes information about teaching progress.
- In teaching, all the modules and units planned in the academic year 2017-2018 were carried out in conformity with the academic calendar. The assessments were all well run and dissertations have been presented up to 15th November 2018. The new academic year 2018-2019 started on 1st October, 2018, according to the decision of the Board of Directors.

- ULK is also running a CPA and a CISCO programme thanks to KASNEB, ICPAR and IBM partnership. To strengthen teaching, learning and assessment, ULK has signed a memorandum of understanding with IBM to make ULK a center of IT professional trainings (IBM MEA (Middle East Africa) University) and install cloud services on ULK premises. So far trainers (ULK lecturers and ULK IT Team) and some computer science students have already completed first trainings, including Mobile Application Development, Web Security and Mobile Application Administration, and got their certificates.
- Additionally, ULK and IBM have already started configuring cloud services, on ULK premises, that will enable the university to provide trainings on modern technologies to students and the general public in areas such as Mobile Application Development, Mobile Application Security, Cyber Security, Cloud Computing and Data Analytics. Trainees ending successfully are awarded an international certificate.
- ULK organised several evaluation tests of English skills and proficiency as well as Cisco Certified Network Associate (CCNA) and IT essentials certificates.

❖ **E-Learning Progress**

ULK is implementing a plan of shifting to teaching and learning in a blended mode. Blended learning is a combination of online learning and face-to-face learning where students can learn at their own place, anywhere, anytime using online content, and collaborative tools while for class time the teacher focuses mainly on practical's in order to prepare students to the real life problems solving fostering skills to meet market needs. This mode is very modern and effective. It is the mainstream teaching and learning mode worldwide.

ULK has uploaded all modules taught at undergraduate level on the Moodle platform. But considering the input from various stakeholders – managers, lecturers, students – we are in process of revamping them mainly taking into account the different modes/styles of learning. In that the University is also taking advantage of its partnership with the Association of Commonwealth Universities aiming at developing learning content for East African Educational Institutions. The partnership is called PEBL (Partnership for Enhanced and Blended Learning)

and has been developed in collaboration with the University of Edinburgh, Association of Commonwealth Universities (ACU), Staff and Educational Development Association (SEDA) and the Commonwealth of Learning (COL). 5 credited modules have been developed and lecturers/instructors from participant universities are soon going to be trained online on teaching them and among them are lecturers from ULK. In January 2019 our University starts teaching these modules in blended mode. Other modules will follow.

Recently, two lecturers from ULK attended a PEBL workshop in Nairobi. They were introduced to the way of finding and using Open Educational Resources (OER). Not only these educational contents can be used freely, but also can be modified, remixed, etc. according to their copyright. We were also introduced to the different Creative Commons copyrights. This will help to create and use high quality online content in our University.

There exists a task force to spearhead e-learning at ULK. It is necessary to appoint also leaders of learning/focal points in each school to coordinate efforts at the level of the school in order to validate the quality of modules and assign instructors to them.

Training on developing content and teaching in blended mode is going to continue in order for ULK to emerge as outstanding regionally and globally as articulated in its vision.

❖ Management Information System

During the academic year 2017-2018, Kigali Independent University ULK implemented its own Management Information System (ULKMIS) to make the university services easily accessible to students.

Lecturers, staff as well as students from both campuses (Gisenyi and Kigali) were introduced to the usage of the system through different trainings which were conducted within the campus during the month of March 2018. Computer labs and their technical support staff were availed to help students who were not familiar with the MIS.

All students enroll, check their marks, claim and interact with the system. At the same time the university staffs do their best to ensure that all students who face challenges are helped on time through the system. The Senior Managers made it among its' priorities to make sure that all

activities were being done smoothly and students' requests are addressed on time. Thus, the MIS was implemented to handle a big number of academic and administrative issues.

2.2. Library

The library is an outstanding teaching and research facility for a university or institution of higher learning. It is a very important tool for better training to every university.

Given that, ULK puts a special attention to it, every year it allocates, in its budget, some funds for buying books, subscribing to local and foreign journals and other necessary tools to ensure high level university training.

Our university is accessible to each and everyone. Several students from different universities operating in our country as well as foreign students, those from DR-Congo for instance, RTUC students and staff, not forgetting cadres from Rubavu District and its surroundings regularly consult books in our library which has become a center of attraction. As a matter of illustration, today, Gisenyi Campus library counts **29,392** books, while Kigali Campus counts **86, 065** books. Besides these books, we have internet-connection and the access is free of charge. Moreover, our library has some CD-ROM containing a lot of titles pertaining of various domains. The physical Library is aided by a digital library of more than 500 computers, connected to important world e-resources.

Considering how well our university is growing in general, and given that the number of books is increasing in particular, we thank our academic authorities as well as the President and Founder of ULK for their willingness and particular importance they attach to the library.

The following is the table showing the evolution of books from 2001 for Gisenyi Campus and from 2010 for Kigali Campus.

Table 10. Evolution of Purchased Books as per year

3.5.3. SCHOOL OF SCIENCE AND TECHNOLOGY

Preliminaries

- Rwanda vision puts stress on the TIC for a sustainable national development. The program aims at producing computer scientists endowed with technical capacities, which were not highlighted in the past in most of local institution's programs. This program will specially aim at covering that aspect. It is oriented towards that development of the capacities required in public, private sectors as well as in that of partnership in the field of TIC in order to find out solutions to their problems thanks to the means provided by the technology of information and communication.
- ULK central mission is to be totally involved in the development of capacities in sciences and Technology in order to bring solutions to the needs of Rwandan Community That program fits the Vision of Rwanda Government and ULK Mission.
- That program which has a vocational vision will provide the students with practical knowledge which will get them to be efficient. It will help them to become competent and competitive on the labour market at local and regional levels.
- The program notably aims at becoming a practical course oriented towards awarding diplomas. At the level of licence, the program contains a great deal of theories and advanced courses of mathematical feature so that the laureates can easily have access to higher diplomas; which was not the case in past when candidates wanted to have access to post- University diplomas; There was no exit to go ahead . The admission requirements for sciences options will consist of having a minimum of 2 marks diploma.
