2.1.7. Library

The library is an outstanding teaching and research facility for a university or institution of higher learning. It is a very important tool for better training to every university.

Given that, ULK puts a special attention to it, every year it allocates; in its budget, some funds for buying books, subscribing to local and foreign journals and other necessary tools to ensure high level university training.

Our university is accessible to each and everyone. Several students from different universities operating in our country as well as foreign students, those from DR-Congo for instance, RTUC students and staff, not forgetting cadres from Rubavu District and its surroundings regularly consult books in our library which has become a center of attraction. As a matter of illustration,

Today, Gisenyi Campus library counts 26,954 books, while Kigali Campus counts 69,000 books. Besides these books, we have internet-connection and the access is free of charge. Moreover, our library has some CD-ROM containing a lot of titles pertaining of various domains.

Considering how well our university is growing in general, and given that the number of books is increasing in particular, we thank our academic authorities as well as the President and Founder of ULK for their willingness and particular importance they attach to the library.

The following is the table showing the evolution of books from 2001 for Gisenyi Campus and from 2010 for Kigali Campus.

3.5.4. SCHOOL OF SCIENCE AND TECHNOLOGY

Preliminaries

- Rwanda vision puts stress on the TIC for a durable national development. The programme aims at producing computer scientists endowed with technical capacities, which were a not highlighted in the past in most of the institutions local programmes. This programme will specially aim at covering that aspect. It is oriented towards that development of the capacities required in public, private sectors as well as in that of partnership in the field of TIC in order to find out solutions to their problems thanks to the means provided by the technology of information and communication.
- ULK central mission is to be totally involved in the development of capacities in sciences and Technology in order to bring solutions to the needs of Rwandan Community That programme fits the Vision of Rwanda Government and ULK Mission.
- That programme which has a vocational vision will provide the students with practical knowledge which will get them to be efficient. It will help them to become competent and competitive on the labour market at local and regional levels.
- The programme notably aims at becoming a practical course oriented towards awarding diplomas. At the level of licence, the program contains a great deal of theories and advanced courses of mathematical feature so that the laureates can easily have access to higher diplomas; which was not the case in past when candidates wanted to have access to post- University diplomas; The was no exit to go ahead . The admission requirements for sciences options will consist of having a minimum of 2 marks diploma.

3.6. COMPUTER SCIENCE CENTRE

Our teaching system is oriented towards finalization and professionalization. In this connection, ULK opened a Computer Science Centre where students are trained to new technologies of information and communication processing.

ULK/ Kigali Computer Science Centre has got 300 computers at the disposal of students and lecturers for different tasks

The Computer Science theoretical course is reinforced by practical exercises.

Access to the Centre is free, which offers more learning opportunities to our students. The computer hall is opened even on week-ends.

Note also that this centre comprises a Cyber net-café with 42 computers connected to the internet.

Internet connection allows the University community to carry out researches, documentation and exchange with the rest of the world. Offices are also connected to internet.
